RCC-TC 35W/WDL/230/G8.5

Product Datasheet Date: 05.11.2025

3700

3000K

15 000h

### **General Data**

Artikel Nr.	32418936
Bestellzeichen	RCC-TC 35W/WDL/230/G8.5
EAN-Faltschachtel	4008597189364
Versandeinheit in Stk.	12
EAN Umkarton (Versandeinheit)	4008597489365
Brutto-Gewicht Versandeinheit in kg	0.315
Länge Versandeinheit in m	0.173
Breite Versandeinheit in m	0.138
Höhe Versandeinheit in m	0.125
Product weight	15 g
Produktstatus	Inaktiv

## **Electric Parameters**

Wattage	39.0 W
Lamp nominal wattage	35 W
Weighted energy consumption in 1000 hours	43 kWh
Mains voltage	230 V
Ignition voltage	3.6 up to 5.0

RCC-TC 35W/WDL/230/G8.5

## **Electric Parameters**

Lamp's nominal current	0.5 A
Nominal choke current	0.5 A
Compensation capacitor for 50Hz operation	6 μF
Running up current max.	190%
Fuse	Daelay-action; min. double nominal current
Controllable (in suitable circuit)	Nein

# **Light Application Parameters**

Luminous flux	3700 lm
Rated lamp luminous flux	3700 lm
Efficacy	94.87 lm/W
Total mains efficacy	95 lm/W
Light colour	warm white de luxe
Colour temperature	3000 K
Color rendering index	85
Lumen maintenance at 2000h	0.85
Lumen maintenance at 4000h	0.82
Lumen maintenance at 6000h	0.78
Lumen maintenance at 8000h	0.77
Lumen maintenance at 12000h	0.76
Lumen maintenance at 16000h	0.70
Lumen maintenance at 20000h	0.65

### **Service Life**

Average life	15000 h	
Lamp survival factor at 2000h	0.99	
Lamp survival factor at 4000h	0.99	
Lamp survival factor at 6000h	0.99	
Lamp survival factor at 8000h	0.96	
Lamp survival factor at 12000h	0.80	
Lamp survival factor at 16000h	0.50	
Lamp survival factor at 20000h	0.19	

## **Specification**

Energylabel notice	old label, no EPREL registration, no EU data sheet
Energylabel (E -> A++)	A+

RCC-TC 35W/WDL/230/G8.5

### **Specification**

Diameter	15 mm
Length	81 mm
Total length max.	81 mm
Burning position	h180
Mercury content	3.3 mg
Lamp shape	Tube, single-ended
Model	Clear
Base	G8.5
Colour	White

### **Notes on Operation**

Burning position	h180	

## Information especially for EPREL

	5.4 1455, 16 E. 1.12 1.0g.6.141.0.1, 110 E0 44.14 5.1501
NAT II	
Miscellaneous	
micoonariooac	

old label, no FPRFL registration, no FU data sheet

Energylabel notice

EU Directive	TIM	

### **Notes**

Mini MH lamp with ceramic burner, tubular bulb clear, light colour WDL, base G8.5. Operation in enclosed luminaire, with ballast and ignitor.

Please, refer to www.radium.de/recycling for notes on disposal of burned-out lamps as well as lamp breakage.

The "lifespan L70" described for LED lamps indicates the number of hours when the luminous flux has decreased to 70% of its initial value. The optinal field 'info about service life' contains the frame conditions according to standards based on which the specific service life has been determined. So, for example, "12B50, 50Hz" means that the mean service life (B50) has been determined with a 12h switching cycle at mains (frequency 50Hz), "3B50, HF" is based on a 3h switching cycle at electronic control gear (high frequency).

### Sockelübersicht

### Spektrale Strahlungsverteilung

Natural daylight is a mixture of direct sunlight and the light of the sky. Therefore, its spectral composition changes permanently due to the changing time of day. The standardised light classification D65 corresponds to a daylight with a colour temperature of approximately 6500 K. Every discharge lamp type has got an individual spectral power distribution according to its chemical filling. From this result important properties light

Should the spectral lines be very close together the lamp presumably has got a very good colour rendering index, so, Ra might be near 100. Does the spectrum rather look like single lines or frayed out the colour rendering of the lamp will probably be not as good.

If number and height of the spectral lines within the blue range (around 400 nm) prevails it might be a lamp with a rather cold light colour like for example daylight. On the other hand, should the red (around 700 nm) or the red and yellow (around 600 nm) range be dominant one can assume that the lamp will be a rather warm light colour like WDL.

# RCC-TC 35W/WDL/230/G8.5

After the lamp start a metal hlide lamp needs about 2-4 minutes time to reach its full luminous flux, all colours in the spectrum are within the discharge arc then.

Visible region from 380 to 780 nm; height of graph corresponding with relative spectral emission (400mW/klm) per 10nm.

daylight(D 65)

### Schaltbeispiel(e)

Standard circuit HID with external ignitor

Key:

L. = lamp

VG = electromagnetic ballast (KVG/VVG)

P = phase

N = zero potential

K = p. f. correction capacitor

Z = ignitor

The required control gear (here ignitor and ballast) for the lamps operation is usually mounted in the suitable luminaire in an appropriate electric circuit. Changes of any kind are to be conducted by qualified and specialised staff, only. Thus, this circuit example is to be understood merely as a technical background information for interested users.

**ECG-operation** 

Key:

L. = lamp

EVG = electronic ballast

P = phase

N = zero potential

The required control gear (here electronic ballast) for the lamps operation is usually mounted in the suitable luminaire in an appropriate electric circuit. Changes of any kind are to be conducted by qualified

and specialised staff, only. Thus, this circuit example is to be understood merely as a technical background information for interested users.

RCC-TC 35W/WDL/230/G8.5

ECG-operation with additional ignitor

Key:

 $L. = lam_l$ 

EVG = electronic ballast

P = phase

N = zero potential

Z = ignitor

The required control gear (here ignitor and electronic ballast) for the lamps operation is usually mounted in the suitable luminaire in an appropriate electric circuit. Changes of any kind are to be conducted by qualified and specialised staff, only. Thus, this circuit example is to be understood merely as a technical background information for interested users.

### Besonderheiten

### Allgemeine Hinweise

The technical design data in accordance with DIN and IEC. The producer does not take any responsibility for damage to persons or property in case of unsuitable operation or handling of the product. Operating data and dimensions are valid within the usual tolerances. Related lamp types (different bases, mains voltages) may be available on request. Sale and delivery are effected in accordance with the Radium Terms of Delivery and Payment valid on the day of conclusion of contract. Packing units offer economical advantages to the purchase and logistic department. Please match your quantity volume accordingly. For orders of a minimum quantity (clefts) with a lamp model the amount lower than the volume of each packaging unit, we will invoice 10 % additional charge per lamp type. Technical changes and terms of delivery are reserved. Manipulation of any kind to packaging or product is not permissible as this will violate Radium brand rights. Furthermore, technical properties of the product can change to its disadvantage or even destruction. Therefore, Radium cannot be responsible for consequential damages.
