Metal halide lamp with quartz burner HRI-TS 150W/WDL/230/XLN/RX7S

Product Datasheet Date: 19.10.2025

3000K

G

12000

12 000h

General Data

Article No.	32418881
Code	HRI-TS 150W/WDL/230/XLN/RX7S
Product EAN	4008597188817
Box quantitiy (pcs.)	12
EAN Box	4008597488818
Gross weight of box in kg	0.489
Length of box in m	0.143
Width of box in m	0.114
Height of box in m	0.153
Product weight	22 g
Product status	Inactive

Electric Parameters

Wattage	150.0 W
Lamp nominal wattage	150 W
Mains voltage	230 V
Ignition voltage	4.0 up to 5.0
Hot restrike voltage	35 kV

HRI-TS 150W/WDL/230/XLN/RX7S

Electric Parameters

Lamp's nominal current	1.8 A
Nominal choke current	1.8 A
Compensation capacitor for 50Hz operation	20 μF
dimmable	No

Light Application Parameters

Luminous flux	12000 lm	
Rated lamp luminous flux	12000 lm	
Efficacy	80 lm/W	
Total mains efficacy	80 lm/W	
Light colour	warm white de luxe	
Colour temperature	3000 K	
Color rendering index	70	
Lumen maintenance at 2000h	0.79	
Lumen maintenance at 4000h	0.75	
Lumen maintenance at 6000h	0.67	
Lumen maintenance at 8000h	0.60	
Lumen maintenance at 12000h	0.50	

Service Life

Average life	12000 h	
Lamp survival factor at 2000h	0.95	
Lamp survival factor at 4000h	0.90	
Lamp survival factor at 6000h	0.85	
Lamp survival factor at 8000h	0.80	
Lamp survival factor at 12000h	0.50	

Specification

Energylabel (G -> A)	G	
Energylabel (E -> A++)	А	
Diameter	23 mm	
Length	135 mm	
Total length max.	135 mm	
Contact distance I	132 mm	
Burning position	p45	
Mercury content	16.7 mg	

HRI-TS 150W/WDL/230/XLN/RX7S

Specification

Lamp shape	Tube, double-ended
Model	Clear
Base	RX7s-24
Colour	White

Notes on Operation

Burning position	p45	

Information especially for EPREL

EPREL ID number	868757	

Miscellaneous

EU Directive	TIM
Similar products	32419661, 32420042, 32419475

Notes

 $Compact\ MH\ lamp\ with\ quartz\ burner,\ tubular\ bulb\ clear,\ light\ colour\ WDL,\ base\ RX7s.\ Operation\ in\ enclosed\ luminaire,\ with\ ballast\ and\ ignitor.$

Please, refer to www.radium.de/recycling for notes on disposal of burned-out lamps as well as lamp breakage.

The "lifespan L70" described for LED lamps indicates the number of hours when the luminous flux has decreased to 70% of its initial value. The optinal field 'info about service life' contains the frame conditions according to standards based on which the specific service life has been determined. So, for example, "12B50, 50Hz" means that the mean service life (B50) has been determined with a 12h switching cycle at mains (frequency 50Hz), "3B50, HF" is based on a 3h switching cycle at electronic control gear (high frequency).

Base

IEC/EN 60061-1 sheet 7004-92A-4

Spectrum

Natural daylight is a mixture of direct sunlight and the light of the sky. Therefore, its spectral composition changes permanently due to the changing time of day. The standardised light classification D65 corresponds to a daylight with a colour temperature of approximately 6500 K.

Every discharge lamp type has got an individual spectral power distribution according to its chemical filling. From this result important properties light colour or colour rendering.

Should the spectral lines be very close together the lamp presumably has got a very good colour rendering index, so, Ra might be near 100. Does the spectrum rather look like single lines or frayed out the colour rendering of the lamp will probably be not as good.

If number and height of the spectral lines within the blue range (around 400 nm) prevails it might be a lamp with a rather cold light colour like for example daylight. On the other hand, should the red (around 700 nm) or the red and yellow (around 600 nm) range be dominant one can assume that the lamp will be a rather warm light colour like WDL.

After the lamp start a metal hlide lamp needs about 2-4 minutes time to reach its full luminous flux, all colours in the spectrum are within the discharge arc then.

Visible region from 380 to 780 nm; height of graph corresponding with relative spectral emission (400mW/klm) per 10nm.

Circuit diagram(s)

Standard circuit HID with external ignitor

Key:

L. = lamp

VG = electromagnetic ballast (KVG/VVG)

P = phase

N = zero potential

K = p. f. correction capacitor

Z = ignitor

The required control gear (here ignitor and ballast) for the lamps operation is usually mounted in the suitable luminaire in an appropriate electric circuit. Changes of any kind are to be conducted by qualified and specialised staff, only. Thus, this circuit example is to be understood merely as a technical background information for interested users.

ECG-operation

Key:

L. = lamp

EVG = electronic ballast

P = phase

N = zero potential

The required control gear (here electronic ballast) for the lamps operation is usually mounted in the suitable luminaire in an appropriate electric circuit. Changes of any kind are to be conducted by qualified

and specialised staff, only. Thus, this circuit example is to be understood merely as a technical background information for interested users.

Special features

General notes

The technical design data in accordance with DIN and IEC. The producer does not take any responsibility for damage to persons or property in case of unsuitable operation or handling of the product. Operating data and dimensions are valid within the usual tolerances. Related lamp types (different bases, mains voltages) may be available on request. Sale and delivery are effected in accordance with the Radium Terms of Delivery and Payment valid on the day of conclusion of contract. Packing units offer economical advantages to the purchase and logistic department. Please match your quantity volume accordingly. For orders of a minimum quantity (clefts) with a lamp model the amount lower than the volume of each packaging unit, we will invoice 10 % additional charge per lamp type. Technical changes and terms of delivery are reserved. Manipulation of any kind to packaging or product is not permissible as this will violate Radium brand rights. Furthermore, technical properties of the product can change to its disadvantage or even destruction. Therefore, Radium cannot be responsible for consequential damages.
