General Data

Code Radium	34411050
Désignation	RNP-T/LR 50W/S/230/E27
EAN 10 (unité)	4008597110504
Unité de transport (pièces)	12
EAN 40 (carton)	4008597410505
Poids brut du carton en kg	0.937
Longueur box in m	0.17
Largeur du carton en m	0.128
Hauteur du carton en m	0.208
Product weight	68 g
Product status	● Inactif

Electric Parameters

Wattage	52.0 W
Lamp nominal wattage	50 W
Weighted energy consumption in 1000 hours	58 kWh
Lamp voltage	90 V
Mains voltage	230 V

Electric Parameters

Ignition voltage	1.8 up to 5.0
Lamp's nominal current	0.8 A
Nominal choke current	0.8 A
Compensation capacitor for 50Hz operation	10 μ F
Running up current max.	125%
Fuse	Daelay-action; min. double nominal current
dimnable	Oui
Controllable (in suitable circuit)	up to 50% (Run up at nominal power)

Light Application Parameters

Luminous flux	4200 lm
Rated lamp luminous flux	4200 lm
Efficacy / Luminous efficiency	80.77 lm/W
Total mains efficacy	81 lm/W
Colour temperature	2000 K
Color rendering index	25
Lumen maintenance at 2000h	0.92
Lumen maintenance at 4000h	0.90
Lumen maintenance at 6000h	0.88
Lumen maintenance at 8000h	0.86
Lumen maintenance at 12000h	0.83
Lumen maintenance at 16000h	0.80
Lumen maintenance at 20000h	0.77

Service Life

Average life	28000 h
B5 - Service life 5% failures	16000 h
B10 - Service life 10% failures	18000 h
Lamp survival factor at 2000h	0.99
Lamp survival factor at 4000h	0.98
Lamp survival factor at 6000h	0.97
Lamp survival factor at 8000h	0.97
Lamp survival factor at 12000h	0.96
Lamp survival factor at 16000h	0.95
Lamp survival factor at 20000h	0.82

Specification

Energylabel notice	old label, no EPREL registration, no EU data sheet
Energylabel (G -> A)	G
Energylabel (E -> A++)	A
Diameter	36 mm
Length	156 mm
Total length max.	156 mm
Burning position	h180
Mercury content	19.0 mg
Lamp shape	Tube, single-ended
Model	Clear
Base	E27

Notes on Operation

Burning position	h180
------------------	------

Information especially for EPREL

Energylabel notice	old label, no EPREL registration, no EU data sheet
EPREL ID number	869011

Miscellaneous

EU Directive	TIM
Similar products	34418089, 34419709

Notes

High pressure sodium lamp long run (4Y), tubular bulb clear, base E27. Operation with ballast and ignitor.

Please, refer to www.radium.de/recycling for notes on disposal of burned-out lamps as well as lamp breakage.

The "lifespan L70" described for LED lamps indicates the number of hours when the luminous flux has decreased to 70% of its initial value.

The optimal field 'info about service life' contains the frame conditions according to standards based on which the specific service life has been determined. So, for example, "12B50, 50Hz" means that the mean service life (B50) has been determined with a 12h switching cycle at mains (frequency 50Hz), "3B50, HF" is based on a 3h switching cycle at electronic control gear (high frequency).

Courbes spectrales

Natural daylight is a mixture of direct sunlight and the light of the sky. Therefore, its spectral composition changes permanently due to the changing

High pressure sodium lamp

RNP-T/LR 50W/S/230/E27

Radium

time of day. The standardised light classification D65 corresponds to a daylight with a colour temperature of approximately 6500 K. Every discharge lamp type has got an individual spectral power distribution according to its chemical filling. From this result important properties light colour or colour rendering. Sodium vapour lamps are very economic, due to the yellow light RNP lamps have got a high luminous efficiency but only modest colour rendering.

After the lamp start a high pressure sodium lamp needs about 6-10 minutes time to reach its full luminous flux.

Visible region from 380 to 780 nm; height of graph corresponding with relative spectral emission (400mW/klm)per 10nm.

Exemple(s) de circuit

Standard circuit HID with external ignitor

Key:

L. = lamp

VG = electromagnetic ballast (KVG/VVG)

P = phase

N = zero potential

K = p. f. correction capacitor

Z = ignitor

The required control gear (here ignitor and ballast) for the lamps operation is usually mounted in the suitable luminaire in an appropriate electric circuit. Changes of any kind are to be conducted by qualified and specialised staff, only. Thus, this circuit example is to be understood merely as a technical background information for interested users.

ECG-operation

Key:

L. = lamp

EVG = electronic ballast

P = phase

N = zero potential

The required control gear (here electronic ballast) for the lamps operation is usually mounted in the suitable luminaire in an appropriate electric circuit. Changes of any kind are to be conducted by qualified and specialised staff, only. Thus, this circuit example is to be understood merely as a technical background information for interested users.

Particularités

Notices explicatives générales

The technical design data in accordance with DIN and IEC. The producer does not take any responsibility for damage to persons or property in case of unsuitable operation or handling of the product. Operating data and dimensions are valid within the usual tolerances. Related lamp types (different bases, mains voltages) may be available on request. Sale and delivery are effected in accordance with the Radium Terms of Delivery and Payment valid on the day of conclusion of contract. Packing units offer economical advantages to the purchase and logistic department. Please match your quantity volume accordingly. For orders of a minimum quantity (clefs) with a lamp model the amount lower than the volume of each packaging unit, we will invoice 10 % additional charge per lamp type. Technical changes and terms of delivery are reserved. Manipulation of any kind to packaging or product is not permissible as this will violate Radium brand rights. Furthermore, technical properties of the product can change to its disadvantage or even destruction. Therefore, Radium cannot be responsible for consequential damages.
