LED tubular lamp
RL-T26 20 2,3W/230/WFL/827/E14

Radium

Product Datasheet Date: 01.11.2026

A++ | 200 | 2700K | 15 000h

General Data

Article No.	42619085
Codice	RL-T26 20 827/F/E14
Product EAN	4008597190858
Box quantitiy (pcs.)	20
EAN Box	4008597490859
Gross weight of box in kg	0.406
Length of box in m	0.24
Width of box in m	0.1
Height of box in m	0.11
Product weight	14 g
Product status	Inattivo

Electric Parameters

Wattage	2.3 W
Weighted energy consumption in 1000 hours	3 kWh
Lamp power	2.3-2.3 W
Power factor	> 0,4
Power factor	0.4

LED tubular lamp

RL-T26 20 2,3W/230/WFL/827/E14

Radium

Electric Parameters

Nominal voltage	220-240 V
Mains Voltage	220 - 240 V
Voltage type	AC
Nominal current	24-24 mA
Nominal current (mA)	24 mA
dimmable	No

Light Application Parameters

Rated lamp luminous flux	200 lm
Luminous flux in 90°-sector	200 lm
Beam angle	160 °
Efficacy / Luminous efficiency	86.96 lm/W
Total mains efficacy	86.96 lm/W
Color temperature	2700 K
Colour rendering index CRI	80-89
Color Stability	≤ 6 sdcm

Service Life

Average life	15000 h
Mean service life	15000 h
No. switching cycles	100000
Lamp survival factor at 6000h	≥ 0.90
Early failure rate at 1000h	≤ 5.0 %

Specification

Energylabel notice	old label, no EPREL registration, no EU data sheet
Energylabel (E -> A++)	A++
Diameter	25 mm
Length	63 mm
Length	63 mm
Mercury content	0.0 mg
Lamp shape	Tube, single-ended
Base	E14
Colour	White
Housing colour	White

LED tubular lamp
RL-T26 20 2,3W/230/WFL/827/E14

Notes on Operation

IP Class (Room/Ceiling)	IP20
Ambient temperatures	-20…+40 °C
With movement sensor	No

Information especially for EPREL

Energylabel notice	old label, no EPREL registration, no EU data sheet
Lighting technology	LED
Life factor EPREL	0.9
Lumen maintenance EPREL	0.93

Notes

Tubular LED lamp for exchange with mini incandescent lamps, base E14. LED light does not contain UV or IR radiation.

Please, refer to www.radium.de/recycling for notes on disposal of burned-out lamps as well as lamp breakage.
The "lifespan L70" described for LED lamps indicates the number of hours when the luminous flux has decreased to 70% of its initial value.
The optinal field 'info about service life' contains the frame conditions according to standards based on which the specific service life has been determined. So, for example, "12B50, 50Hz" means that the mean service life (B50) has been determined with a 12h switching cycle at mains (frequency 50Hz), "3B50, HF" is based on a 3h switching cycle at electronic control gear (high frequency).

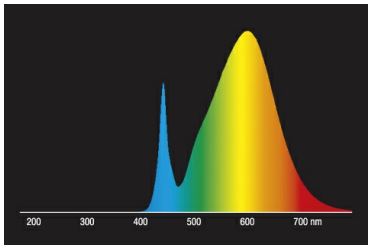

Base

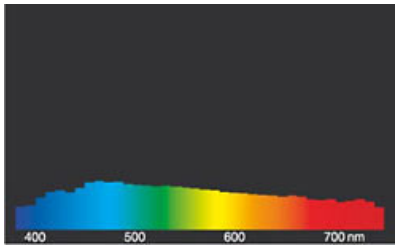

E14
IEC/EN 60061-1
sheet 7004-23-6

Spectrum

As daylight is a mixture of direct sunlight and light from the sky, the spectral distribution changes all the time due to the time of the day and the weather. The standard illuminant D65 corresponds to daylight with colour temperature of about 6500K.
The colour of coloured LEDs depends on the chemical elements within the light generating chip. The coloured light is generated directly and does not need filtering.
White LEDs are either RGB (red + green + blue chip in one LED = light colour white) or blue LED-chips with yellow/orange phosphor in the resin.
Visible region from 380 to 780 nm; height of graph corresponding with relative spectral emission (400mW/klm)per 10nm.

LED retrofit standard lamps 25W replacement, 2700K

daylight(D 65)

Special features

LED tubular lamp
RL-T26 20 2,3W/230/WFL/827/E14

General notes
For LED replacement of halogen and incandescent lamps, we recommend direct replacement (1: 1) at the respective burning position. For new systems, the number of lamps in the circuit operated at control gear such as transformers or dimmers can be obtained from corresponding compatibility lists (if available). If there is no specification for the type of device or lamp required, for safety reasons, the replacement power shall be assumed as taht of the original halogen type (eg "RL-MR16 35" -> 35W, independent of the real power consumption).

The technical design data in accordance with DIN and IEC. The producer does not take any responsibility for damage to persons or property in case of unsuitable operation or handling of the product. Operating data and dimensions are valid within the usual tolerances. Related lamp types (different bases, mains voltages) may be available on request. Sale and delivery are effected in accordance with the Radium Terms of Delivery and Payment valid on the day of conclusion of contract. Packing units offer economical advantages to the purchase and logistic department. Please match your quantity volume accordingly. For orders of a minimum quantity (clefts) with a lamp model the amount lower than the volume of each packaging unit, we will invoice 10 % additional charge per lamp type. Technical changes and terms of delivery are reserved. Manipulation of any kind to packaging or product is not permissible as this will violate Radium brand rights. Furthermore, technical properties of the product can change to its disadvantage or even destruction. Therefore, Radium cannot be responsible for consequential damages.

Subject to change without notice. Errors and omissions excepted.

Safety instructions
To ensure full light efficiency and product life, the permissible temperature ranges must be observed and dry environment ensured. When operated with existing control gear, their compatibility with the lamp must be checked.

All technical data without guarantee.
