

Metal halide lamp with quartz burner

HRI-TS 1000W/D/S/ECG/K12S

Radium

Product Datasheet Date: 05.04.2026

A+

117000

6000K

6 000h

General Data

Article No.	32416647
Kod	HRI-TS 1000W/D/S/ECG/K12S
Product EAN	4008597166471
Box quantity (pcs.)	10
EAN Box	4008597466472
Gross weight of box in kg	1.411
Length of box in m	0.4
Width of box in m	0.17
Height of box in m	0.27
Product weight	59 g
Product status	● Nieaktywne

Electric Parameters

Wattage	1200.0 W
Lamp voltage	125-150 V
Mains voltage	230 V
Nominal current (A)	9.6 A
Controllable (in suitable circuit)	Nie

Light Application Parameters

Luminous flux	117000 lm
Rated lamp luminous flux	117000 lm
Efficacy	97.5 lm/W
Total mains efficacy	97 lm/W
Light colour	daylight
Colour temperature	6000 K
Color rendering index	88
Lumen maintenance at 2000h	0.98
Lumen maintenance at 4000h	0.98
Lumen maintenance at 6000h	0.97
Lumen maintenance at 8000h	0.88
Lumen maintenance at 12000h	0.81
Lumen maintenance at 16000h	0.79
Lumen maintenance at 20000h	0.76

Service Life

Average life	6000 h
B5 - Service life 5% failures	2500 h
Lamp survival factor at 2000h	0.97
Lamp survival factor at 4000h	0.79
Lamp survival factor at 6000h	0.50

Specification

Energylabel notice	no Label needed (> 82.000 lm)
Energylabel (E -> A++)	A+
Diameter	41 mm
Length	187 mm
Total length max.	187 mm
Burning position	p15/s15
Mercury content	75.0 mg
Lamp shape	Tube, double-ended
Model	Clear
Base	K12s-36
Colour	White

Notes on Operation

Burning position	p15/s15
------------------	---------

Information especially for EPREL

Energylabel notice	no Label needed (> 82.000 lm)
--------------------	-------------------------------

Miscellaneous

EU Directive	TIM
Similar products	32416576, 32416593

Notes

Metal halide short arc lamp clear, daylight, high luminous flux, base K12s. Operation in enclosed luminaire and with ECG (no flicker).

Please, refer to www.radium.de/recycling for notes on disposal of burned-out lamps as well as lamp breakage.

The "lifespan L70" described for LED lamps indicates the number of hours when the luminous flux has decreased to 70% of its initial value. The optimal field 'info about service life' contains the frame conditions according to standards based on which the specific service life has been determined. So, for example, "12B50, 50Hz" means that the mean service life (B50) has been determined with a 12h switching cycle at mains (frequency 50Hz), "3B50, HF" is based on a 3h switching cycle at electronic control gear (high frequency).

Base

K12s-36
IEC/EN 60061-1
Sheet 7004-168-1

Spectrum

Natural daylight is a mixture of direct sunlight and the light of the sky. Therefore, its spectral composition changes permanently due to the changing time of day. The standardised light classification D65 corresponds to a daylight with a colour temperature of approximately 6500 K. Every discharge lamp type has got an individual spectral power distribution according to its chemical filling. From this result important properties light colour or colour rendering.

Should the spectral lines be very close together the lamp presumably has got a very good colour rendering index, so, Ra might be near 100. Does the spectrum rather look like single lines or frayed out the colour rendering of the lamp will probably be not as good.

If number and height of the spectral lines within the blue range (around 400 nm) prevails it might be a lamp with a rather cold light colour like for example daylight. On the other hand, should the red (around 700 nm) or the red and yellow (around 600 nm) range be dominant one can assume that the lamp will be a rather warm light colour like WDL.

After the lamp start a metal halide lamp needs about 2-4 minutes time to reach its full luminous flux, all colours in the spectrum are within the discharge arc then.

Visible region from 380 to 780 nm; height of graph corresponding with relative spectral emission (400mW/klm) per 10nm.

Circuit diagram(s)

EVG-Betrieb
Zeichenerklärung:
L. = Lampe
EVG = Elektronisches Vorschaltgerät
P = Phase
N = Null-Leiter

Die notwendigen Geräte (hier elektronisches Vorschaltgerät) zum Betrieb der Lampe sind normalerweise bereits in den dafür geeigneten Leuchten in der entsprechenden Schaltung installiert. Änderungen aller Art sind nur von qualifiziertem Fachpersonal durchzuführen. Dieses Schaltungsbeispiel ist daher lediglich als technische Hintergrund-Information für interessierte Anwender zu verstehen.

General notes

The technical design data in accordance with DIN and IEC. The producer does not take any responsibility for damage to persons or property in case of unsuitable operation or handling of the product. Operating data and dimensions are valid within the usual tolerances. Related lamp types (different bases, mains voltages) may be available on request. Sale and delivery are effected in accordance with the Radium Terms of Delivery and Payment valid on the day of conclusion of contract. Packing units offer economical advantages to the purchase and logistic department. Please match your quantity volume accordingly. For orders of a minimum quantity (clefts) with a lamp model the amount lower than the volume of each packaging unit, we will invoice 10 % additional charge per lamp type. Technical changes and terms of delivery are reserved. Manipulation of any kind to packaging or product is not permissible as this will violate Radium brand rights. Furthermore, technical properties of the product can change to its disadvantage or even destruction. Therefore, Radium cannot be responsible for consequential damages.
