Configuration by App

SMART Blue Remote – Arranging by App

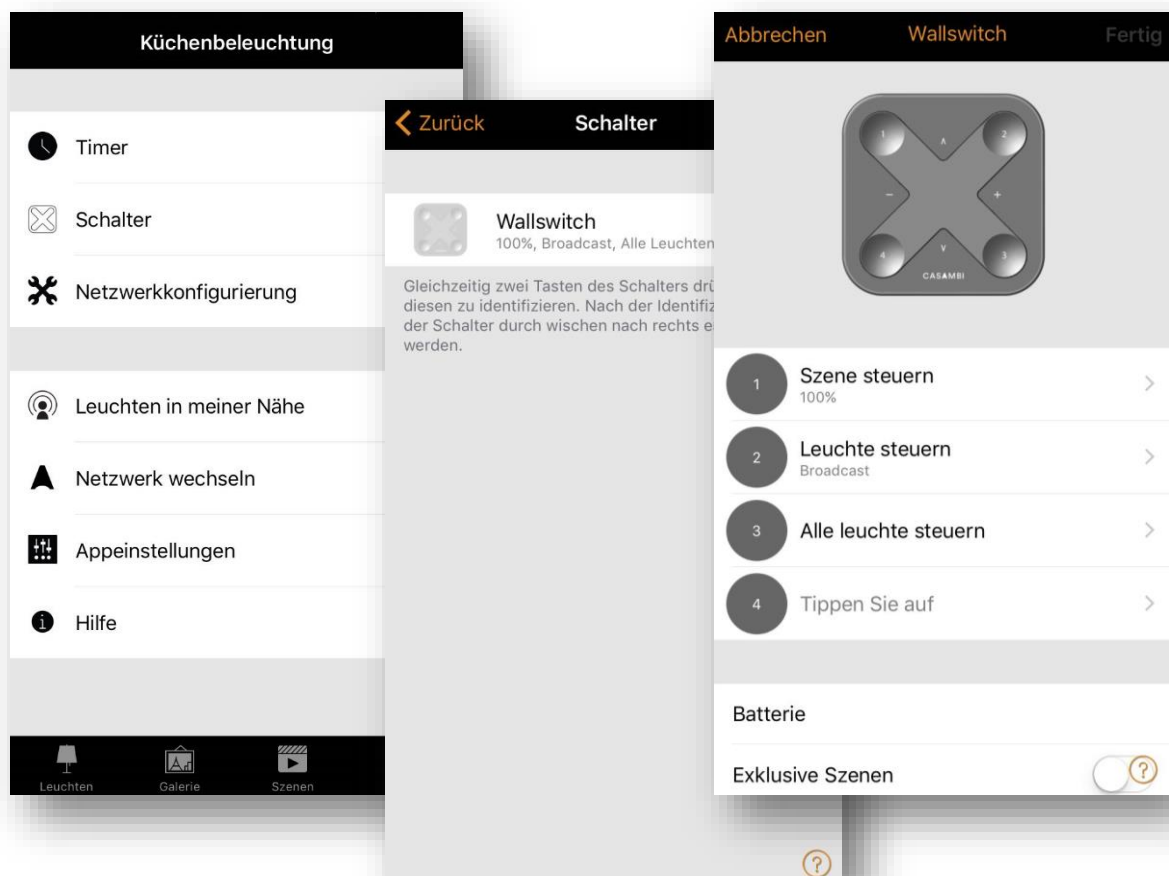

SMART Blue Remote can be configured via the Casambi app.

Go to „More“ tab and than choose „Switch“.

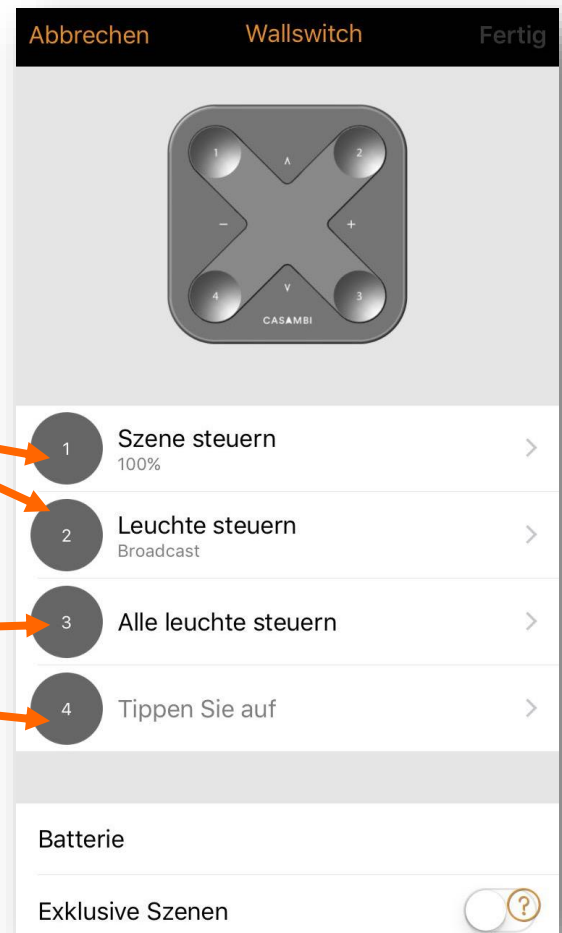

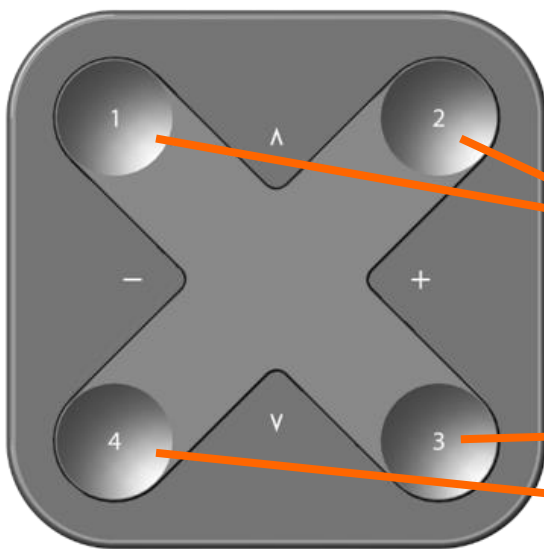

To find SMART Blue Remote in the app, at first you have to push any of the push-buttons, so that there appears a light on SMART Blue Remote. Thereby Casambi app is able to identify the Switch.

Now your SMART Blue Remote will appear in the shown list. Choose your SMART Blue Remote to arrange all preset buttons.

To unpair the SMART Blue Remote, press two arbitrary buttons at once. The App will identify it and with a wipe to the right you can unpair it.

SMART Blue Remote – Preset Button

- 1, 2, 3, 4:** preset button
- , +:** Dim buttons
- ^, v:** Multipurpose buttons

Preset Buttons

You can allocate single lamps or already existing groups and scenes* to a preset button and then control them by the button.

Therefore you have to choose your SMART Blue Remote in „Switch“ tab. There will appear a screen with different options to configure every preset button individual.

1. Choose „Switch“ in „More“ tab
2. Press any button of SMART Blue Remote to connect it with the app
3. Choose SMART Blue Remote „Wallswitch“
4. Choose any button (1-4) to program it with one of a possible function (control scene, group control, lamp control, control all lamps) and if necessary add lamps, groups or scenes
5. Tab „Done“

To delete or to change a function of an already programmed button, select the button again and choose „Delete“.

Application

Tap:

- The chosen pre-set (lamp control, group control, all lamps, scene recall or animation recall) will turn on

Tap again:

- The chosen pre-set (lamp control, group control, all lamps, scene recall or animation recall) will turn off

* Information to settings of e.g. groups and scenes you get in our app guide

Dim Button

Use the Dim up (+) or Dim down (-) Button to dim the luminaire or the luminaire group which is controlled by the SMART Blue Remote.

To control the lamps you have to add them to one of the Preset Buttons (see „preset button“). To dim the lamp you have to press at first the configured Preset Button and then the Dim Button.

Application

Tap the Dim down button:

- Chosen pre-set goes to 0%

Tap the Dim up button:

- Chosen pre-set goes to 100%

Hold the Dim down or Dim up button:

- Smooth dimming of last chosen pre-set

Multipurpose Button

By Multipurpose Button you can control the colour temperature or direct/indirect ratio.

Therefor you have to add the lamps you want to control to one of the Preset Buttons (see „Preset Button“). At first press the Preset Button on your SMART Blue Remote and then the Multipurpose Button to change the colour temperature or the direct/indirect ratio (depending on lamps).

Application – Colour Temperature

Hold the Multipurpose Button:

- Changes colour temperature smoothly

Tap the upper Multipurpose Button:

- Changes to the warmest colour temperature

Tap the lower Multipurpose Button:

- Changes the coldest colour temperature

Application - direct/indirect Ratio

Hold the upper Multipurpose Button:

- Dims up smoothly the indirect lighting

Hold the lower Multipurpose Button:

- Dims up smoothly the direct lighting

Tap the upper Multipurpose Button:

- The indirect part goes to max level

Tap the lower Multipurpose Button:

- The direct part goes to max level

*sum of indirect/direct in all cases 100%

The free Casambi App is available in App- or Play-Store.
